

ULTRA-LINK 1000

ANOTHER STEP AHEAD

The ULTRA-LINK XL 1000 Diagnostic Tool is a universal tool designed to work on ALL diesel engines, transmissions and ABS brake systems utilizing J1587/1708 and J1939 protocols broadcast in a non-proprietary format. The ULTRA-LINK Diagnostic Tool simply plugs into the diagnostic outlet on the engine or in the cab of the vehicle, and will read the digital data stream from the Electronic Control Module (ECM) and displays the various functions and error codes.

NEW FEATURES...

- ~ **MENU** - New easy to use menu key. Change protocols or functions quickly and easily.
- ~ **STORES RECORDS** - Stores up to 36 records in the Ultra-Link XL before downloading.
- ~ **PLAYBACK FEATURE** - Playback a previously stored record. Look at any record stored as though you were still hooked up to the truck. View all parameters and trouble codes without having to be connected to the PC.
- ~ **DELETES RECORDS** - Delete stored records from the Ultra-Link Tool or from the PC.
- ~ **DISPLAYS MANUFACTURES' CODES**

DOWNLOAD FEATURES...

- ~ **MAKE YOUR OWN REPORTS** - Information can be exported to your spreadsheet Program to allow you to build customized reports for your company's individual needs.
- ~ **HARD COPY PRINTOUTS** - Print hard copies containing all the information contained in The vehicle ECU at the time it was stored. These hard copies can be shared with customers or used as file records.
- ~ **ORGANIZES YOUR WORK** - The Ultra-Link download allows for the alpha-numeric input of a unit number or job number to allow for easy information organization.
